Notes

1. The seller has not been identified as established in Germany. For a service supplied to a business in Germany the buyer then owes the VAT (reverse charge, § 13b UStG). The buyer declares it and, where entitled, deducts it as input VAT in the same return. No invoice from the seller is required for that (sec. 13b.15 UStAE). If the seller is established in Germany after all, the seller owes the VAT. This voucher is then not an invoice and gives no right to deduct input VAT. Euro amounts follow the stated FX method and are provisional until the tax adviser confirms it.
2. Each line sums one month of payments to the same endpoint. Quantity, unit price and total in USDC come from the transfers on Base.
3. Descriptions come from the seller’s 402 answer (catalogue) or from the paying agent’s report.
4. This voucher does not replace an invoice and is not tax advice.
5. Responsible issuer: 402lounge, on behalf of Brightwater Analytics GmbH. Prepared automatically on 1 October 2026 from the payments read on Base.
